

## **Protect your children! Change your private school to a 'homeschool co-op'**

Throughout New York state, county and state employees of the 'health department' are trespassing upon Amish and Mennonite private property attempting to force parents to submit their children to the needle, or else watch their private schools be forcibly shut down. Vaccines are NOT safe, and even if someone thinks they are, forcing them on others is NOT appropriate. It must be noted that the U.S. Court of Claims has awarded over 4.2 billion dollars to people injured by vaccines. This certainly indicates vaccines are NOT safe. It is dishonest for department employees to refuse to provide a full vaccine ingredients list, which identifies hundreds of harmful chemicals and pathogens present in vaccines. It is dishonest for the county and state employees to refuse to disclose that their pensions are heavily invested in the pharmaceutical corporations that make the vaccines they are pushing. It is also dishonest for county and state employees to refuse to inform you of the solution: simply start a homeschool co-op. As a private school the state demands forced vaccinations, with homeschooling they cannot. The letter provided here can be used, just write your name, address, child's name and grade, and the year. Mail or hand deliver a letter to the superintendent of your local school district for each child you have. Protect your children! Start your homeschool co-op!
